SELORM J. AKOTO

CROSS PLATFORM
DEVELOPER

SUMMARY

I pride myself as a software engineer with experience in designing, architecting and developing software solutions for real world problems.

EXPERIENCE

SIDE PROJECTS

YediTech | October 2020 - Present
Nigeria (Intern)

Developing mobile applications for YediTech's partners and collaborating with the Backend Engineers to develop various Application Programming Interface (APIs) for the various mobile and web applications.

- Caching large data
- Offline First
- Authentication

Nerve
Ghana

Nerve a chat application with games such as Truth or Dare built in it. I built the app in React Native and backend in python with the Flask framework for fast API development.

- Auto generated Truth or Dare question with AI
- Lighting fast messaging powered by Firebase
- Scalable

OnetunePlus
Ghana

Built and deployed Onetune+ Application for Android (React Native) from scratch. Implementing Complex and Native concepts like:

- Push Notification
- Caching Music
- ScreenProps Management
- Music Streaming and Audio API
- Authentication

Homey
Ghana

Built Homey Application for IOS/Android (React Native) from scratch. Homey is a platform for students to inspect and book hostels online. Implementing Complex and Native concepts like:

- Push Notification
- Map Interactions
- Authentication

SKILLS

React **Javascript**
React Native **Python**
Git/Github
NodeJs/Express.js
Flask

EDUCATION

BSc COMPUTER SCIENCE
University of Cape Coast, UCC
2019-2023 | Cape Coast, Ghana

Keta Senior High Technical School
2015-2018 | Keta, Ghana

Keta Basic/Junior High School
2015 | Keta, Ghana

ACHIEVEMENTS

- Onetune was nominated for Best Entertainment Company and Media House of the year awards at Volta Music Awards 2018.

PROJECTS

NERVE

Nerve is a social messaging app with feature in built games such as Truth or Dare. We want to give friends the opportunity to play games they usually will play offline online. Users can create groups with virtually limited members and play games together with lighting fast messaging and AI based games.
Available here NERVE

HOMEY

Homey is mobile application, which helps students to inspect and book hostels online without going through the stressful traditional method. With features such as Map interactions, online secure payment (powered by Paystack) and easy to use interface.
Available here HOMEY

ONETUNE PLUS

Onetune+ is a music streaming and music hosting service provider, where upcoming artists and musicians can host their tracks for free and music lover have the opportunity to download to their local library or stream online absolutely free.
Available here ONETUNEPLUS
